

Md. Sakib Hosen

Jr. Backend Developer | Competitive Programmer

Dhaka, Bangladesh | +8801971311958 | md.sakib.hos3n@gmail.com

GitHub: github.com/chatok-jnr | LinkedIn: linkedin.com/in/chatok-junior | Portfolio: iamchatokjunior.netlify.app

About Me

Backend focused Junior Software Developer with hands-on experience across Java/Spring Boot and Node.js/Express, building secure, scalable RESTful APIs backed by PostgreSQL and MongoDB. Proficient in Spring Security, JPA, and Prisma ORM, with a strong foundation in OOP, layered architecture, and software design principles. Eager to contribute and grow through real-world Agile development.

Skills

Languages	Java, C++, SQL, JavaScript, TypeScript
Backend	Spring Boot, Spring Security, Spring Data JPA, NestJS, Express.js, Node.js, REST APIs
Database	PostgreSQL, MySQL, MongoDB, Hibernate (JPA), Mongoose, Prisma
Tools	Git, Docker, Jira, Postman, DBeaver, Linux
Methodology	Data Structures & Algorithms, OOP, Layered Architecture, Agile

Experience

Maktech

Jul 2026 – Present

Backend Developer Intern (MERN)

- Built JWT-based auth with access/refresh token rotation and role-based authorization
- Integrated Stripe payments, including webhook handling and subscription billing
- Designed relational PostgreSQL schemas via Prisma ORM with nested writes and migrations
- Implemented per-user/IP API rate limiting with proper HTTP headers to prevent abuse

Education

B.Sc. in Computer Science and Engineering

Expected Dec 2026

University of Information Technology & Sciences (UITS) | CGPA: 3.63/4.00 (7th semester)

Projects

LegalAid – Legal Services Marketplace Platform

Apr 2026 – Present

Backend | Java 21, Spring Boot 3.x, Spring Security, PostgreSQL, JWT, Cloudinary

- Architected a modular monolith backend across 16 packages (auth, lawyer, service, contract, payment, dispute, etc.) serving a two-sided marketplace with CLIENT, LAWYER, and ADMIN roles
- Designed a 35-table PostgreSQL schema with soft deletes, composite partial indexes, DB-level triggers for rating auto-calculation, and referential integrity constraints
- Implemented stateless JWT authentication with Google OAuth 2.0, 15-minute access tokens, 7-day refresh token rotation via HttpOnly cookies, and role-based `@PreAuthorize` guards
- Implemented a contract state machine with role-based cancellation rules, service data snapshotting, and 5% platform fee calculation
- Integrated Cloudinary for backend-validated file uploads with MIME enforcement, 50MB limit, per-user folder isolation, and orphan cleanup
- Designed an async notification system (`@Async`) covering 19 event types, decoupled from business logic
- Identified and resolved an N+1 query bottleneck using `@EntityGraph`, reducing queries from 72 to 1 per page
- Containerized with Docker, published to Docker Hub, and deployed on Render
- GitHub: github.com/chatok-jnr/LegalAid-Backend

BiteNow – Multi-Vendor Food Delivery Platform

Dec 2025 – Jan 2026

Full Stack | React, Node.js, Express.js, MongoDB, JWT, Passport.js

- Architected a food delivery platform supporting four user roles with role-based access control and independent dashboards
- Developed 40+ RESTful APIs covering authentication, restaurants, orders, carts, rider management, and administration
- Implemented Google OAuth with JWT-based authentication
- Integrated Cloudinary and Mapbox for media uploads, document verification, geolocation, and delivery routing
- Built guest cart management, restaurant approval workflow, and audit logging for admin operations
- Developed a multi-stage document verification workflow for restaurant owners and delivery riders with admin approval
- Secured protected endpoints using JWT, Passport.js, and role-based authorization across multiple user roles
- GitHub: github.com/chatok-jnr/BiteNow

E-commerce API – Backend Marketplace Platform

Jul 2026

Backend | Node.js, Express, Prisma, PostgreSQL, JWT, Stripe, API Rate Limiting

- Designed a relational PostgreSQL database with Prisma supporting users, products, carts, orders, payments, and RBAC
- Implemented JWT authentication with refresh token rotation, role-based authorization, and secure HttpOnly cookies
- Built shopping cart, checkout, and Stripe payment workflows with webhook-driven order synchronization
- Added order cancellation, inventory restoration, and API rate limiting for reliability and security
- GitHub: github.com/chatok-jnr/E-commerce-API

Competitive Programming & Achievements

- ICPC Asia Dhaka Regional Finalist 2024, 2025 (Team UITS_ACES)
- Competed in 6 Inter-University Programming Contests [IUT, KUET, UIU, AUST, UU, IUT]
- 20th in BUBT Inter-University Collaborative Programming Contest 2025
- Champion — UITS Hackify Fest Programming Contest 2025
- Champion — Intra University Programming Contest 2025
- Champion — UITS Winter Fest Programming Contest 2024 (Solo)
- Codeforces: **sakibAnsary** — Pupil (Max 1389)
- CodeChef: **chatok_junior** — 3 Star (Max 1724)

Leadership

Team Lead – UITS_ACES (Programming Team)

2023 – Jul 2026

- Led a team of 3 competitive programmers, coordinating problem-solving strategy across ICPC Asia Dhaka Regional appearances (2024, 2025)
- Organized and ran weekly practice sessions covering algorithmic problem-solving and contest strategy

Mentoring & Outreach

- Mentored junior university students in competitive programming fundamentals and contest preparation
- Organized and served as problem setter for the Inter-University Junior Programming Contest

Hobbies & Interests

- **Competitive Programming** — active participant in online judges, continuously solving algorithmic challenges
- **Reading Tech Blogs** — follow latest trends in software engineering, backend scaling, and system design
- **Gaming** — strategy and puzzle-based games that enhance problem-solving skills
- **Fitness & Sports** — regularly practice football
- **Photography** — capturing urban and natural landscapes
- **Coding Side Projects** — building personal projects and exploring new technologies
